VIII. Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the questions whether the claims are fully supported by the description, are made:

Claims 1-26 are objected to as lacking clarity under PCT Rule 66.2(a)(v) because of the claims are not fully supported by the description. The description does not disclose the claimed invention in a manner sufficiently clear and complete for the claimed invention to be carried out by a person skilled in the art because: The claims encompass providing any fish cell wherein the cell will contribute to the germ line. Not all fish cell types possess the potency to contribute to the germ-line. Only fish ES cells have been shown to contribute to the germ line and the claims should be narrowed in scope accordingly.
